Notes to the condensed consolidated interim financial statements

June 30, 2024

(Stated in U.S. dollars unless otherwise noted)

(Unaudited)

1. Basis of presentation and going concern assumption

Ivanhoe Mines Ltd. is a mining, development and exploration company incorporated in Canada which, together with its subsidiaries and joint venture, is focused on the mining, development and exploration of minerals and precious metals from its property interests located primarily in Africa.

The registered and records office of the Company is located at Suite 606-999 Canada Place, Vancouver, British Columbia, Canada V6C 3E1. The Company is listed on the Toronto Stock Exchange ("TSX") under the ticker symbol IVN. The shares of the Company are also traded on the OTCQX Best Market in the United States of America under the symbol IVPAF.

The Company's condensed consolidated interim financial statements have been prepared using accounting policies in accordance with IFRS Accounting Standards applicable to the preparation of interim financial statements, under International Accounting Standard 34, Interim Financial Reporting.

These condensed consolidated interim financial statements do not include all of the information and footnotes required by IFRS Accounting Standards for complete financial statements for year-end reporting purposes. Results for the three and six months ended June 30, 2024, are not necessarily indicative of future results.

These condensed consolidated interim financial statements have been prepared on the historical cost basis with the exception of certain financial instruments and share-based payments which are measured at fair value. Historical cost is generally based on the fair value of the consideration given in exchange for assets. The financial statements are also prepared on a going concern basis, which contemplates the realization of assets and settlement of liabilities in the normal course of business.

The Company has an accumulated profit of \$830.1 million at June 30, 2024 (December 31, 2023: \$819.2 million). As at June 30, 2024, the Company's total assets exceeds its total liabilities by \$4,580.5 million (December 31, 2023: \$3,580.9 million) and current assets exceeds current liabilities by \$49.7 million (December 31, 2023: current liabilities exceeded current assets by \$348.4 million).

2. Material accounting policies

The material accounting policies used in these condensed consolidated interim financial statements have been consistently applied to all periods presented, unless otherwise stated, and are as follows:

(a) Statement of compliance

The accounting policies applied by the Company in these condensed consolidated interim financial statements are the same as those applied by the Company in its most recent annual consolidated financial statements as at and for the year ended December 31, 2023 except for the application of new and revised accounting standards mentioned in Note 3.

These unaudited condensed consolidated interim financial statements should be read in conjunction with the Company's audited consolidated financial statements as at and for the year ended December 31, 2023.

(b) Significant accounting estimates and judgments

The preparation of condensed consolidated interim financial statements in conformity with IAS 34 requires the Company's management to make estimates and assumptions concerning the future. The resulting accounting estimates can, by definition, only approximate the actual results. Estimates are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Significant accounting judgments are accounting policies that have been identified as being complex or involving subjective judgments or assessments.

2. Material accounting policies (continued)

(b) Significant accounting estimates and judgments (continued)

Significant accounting estimates and judgments include, amongst other things, the recoverability of assets, the determination of the functional currency, technical feasibility and commercial viability of projects, the classification of Kamo Holding Limited as a joint venture, the determination of inputs into lease accounting, the valuation of the embedded derivative liability associated with the convertible notes, deferred revenue, deferred tax, provisions for tax claims, the provisionally-priced revenue, remeasurement of contract receivables and bill-and-hold arrangements of the Kamo Holding Limited joint venture.

(c) Future accounting changes

The following new standards, amendments to standards and interpretations have been issued but are not effective during the six months ended June 30, 2024. The Company has not yet adopted these new and amended standards.

- **Amendment to IAS 21 - Lack of Exchangeability:** An entity is impacted by the amendments when it has a transaction or an operation in a foreign currency that is not exchangeable into another currency at a measurement date for a specified purpose. A currency is exchangeable when there is an ability to obtain the other currency (with a normal administrative delay), and the transaction would take place through a market or exchange mechanism that creates enforceable rights and obligations. (i)

The Company has considered the amendment and assessed that it will have no material impact on adoption.

- **Amendment to IFRS 9 and IFRS 7 - Classification and Measurement of Financial Instruments:** These amendments clarify the requirements for the timing of recognition and derecognition of some financial assets and liabilities, with a new exception for some financial liabilities settled through an electronic cash transfer system. They also clarify and add further guidance for assessing whether a financial asset meets the solely payments of principal and interest (SPPI) criterion, add new disclosures for certain instruments with contractual terms that can change cash flows (such as some instruments with features linked to the achievement of environment, social and governance (ESG) targets), and make updates to the disclosures for equity instruments designated at Fair Value through Other Comprehensive Income (FVOCI). (ii)

The Company has considered the amendment and assessed that it will have no material impact on adoption.

IFRS 18 Presentation and Disclosure in Financial Statements: This is the new standard on presentation and disclosure in financial statements, with a focus on updates to the statement of profit or loss. The key new concepts introduced in IFRS 18 relate to the structure of the statement of profit or loss, required disclosures in the financial statements for certain profit or loss performance measures that are reported outside an entity's financial statements (that is, management-defined performance measures), and enhanced principles on aggregation and disaggregation which apply to the primary financial statements and notes in general. (iii)

The Company is assessing the impact of this amendment on its financial statements.

2. Material accounting policies (continued)

(c) Future accounting changes (continued)

- **IFRS 19 Subsidiaries without Public Accountability: Disclosures:** This new standard works alongside other IFRS Accounting Standards. An eligible subsidiary applies the requirements in other IFRS Accounting Standards except for the disclosure requirements and instead applies the reduced disclosure requirements in IFRS 19. IFRS 19's reduced disclosure requirements balance the information needs of the users of eligible subsidiaries' financial statements with cost savings for preparers. IFRS 19 is a voluntary standard for eligible subsidiaries. A subsidiary is eligible if it does not have public accountability, and it has an ultimate or intermediate parent that produces consolidated financial statements available for public use that comply with IFRS Accounting Standards. (iii)

The Company is assessing the impact of this amendment on its financial statements.

- (i) Effective for annual periods beginning on or after January 1, 2025
- (ii) Effective for annual periods beginning on or after January 1, 2026
- (iii) Effective for annual periods beginning on or after January 1, 2027

3. Application of new and revised standards

The following standards became effective for annual periods beginning on or after January 1, 2024. The Company adopted these standards in the current period and they did not have a material impact on its condensed consolidated interim financial statements unless specifically mentioned below.

- Amendment to IFRS 16 – Leases on sale and leaseback. These amendments include requirements for sale and leaseback transactions in IFRS 16 to explain how an entity accounts for a sale and leaseback after the date of the transaction. Sale and leaseback transactions where some or all the lease payments are variable lease payments that do not depend on an index or rate are most likely to be impacted.
- Amendment to IAS 7 and IFRS 7 - Supplier finance. These amendments require disclosures to enhance the transparency of supplier finance arrangements and their effects on a company's liabilities, cash flows and exposure to liquidity risk. The disclosure requirements are the IASB's response to investors' concerns that some companies' supplier finance arrangements are not sufficiently visible, hindering investors' analysis.

3. Application of new and revised standards (continued)

- Amendment to IAS 1 – Non-current liabilities with covenants and Amendment to IAS 1 - Classification of Liabilities as Current or Non-current.

The adoption of the amendments to IAS 1 has a material effect on the Company's financial statements, particularly impacting the classification of the host liability and embedded derivative liability associated with the convertible notes.

These amendments clarify how conditions with which an entity must comply within twelve months after the reporting period affect the classification of a liability. The amendments also aim to improve information an entity provides related to liabilities subject to these conditions. Furthermore, the amendments clarify that a conversion option does not affect the Company's classification of the liability, but only if the option meets the fixed-for-fixed criteria and is classified and recognized as a separate equity component in accordance with IAS 32, Financial Instruments: Presentation. If a conversion option in a loan agreement does not satisfy the fixed-for-fixed criteria, the entity would classify the liability as current.

The conversion feature included in the Company's convertible notes fails the 'fixed for fixed' criteria and is therefore not classified as an equity instrument. Although the terms of the convertible notes allow for settlement in the Company's own equity instruments, that alternative is not classified as an equity instrument, the terms of the convertible feature are taken into account in the classification of the liability. The convertible senior notes issued by the Company can be called by the holder at any time in the next 12 months, barring the conditions disclosed in Note 15 are met.

The impact of the adoption of the amendments to IAS 1 on the Company's consolidated statements of financial position as at December 31, 2023 and January 1, 2023 is as follows:

	December 31, 2023	IAS 1 Amendment	December 31, 2023 (Restated)

Upon conversion, the convertible notes may be settled, at the Company's election, in cash, common shares or a combination thereof. Due to this election right and conversion feature the classification of the convertible notes (host liability and embedded derivative liability) as current liabilities does not impact the Company's liquidity.

The Company has early redeemed the convertible notes. See Note 15 for further information.

4. Investment in joint venture

Kamoa Holding Limited (“Kamoa Holding”), a joint venture between the Company and Zijin Mining Group Co., Ltd. (“Zijin”), holds a direct 80% interest in the Kamoa-Kakula Copper Complex (“Kamoa-Kakula”). The Company holds an effective 39.6% interest in the project through its 49.5% shareholding in Kamoa Holding. Zijin holds 49.5% of Kamoa Holding while the remaining 1% share interest is held by privately-owned Crystal River Global Limited (“Crystal River”) (see Note 9).

The costs associated with mine development at Kamoa-Kakula’s Kansoko and Kakula sites were capitalized as property, plant and equipment in Kamoa Copper SA (a subsidiary of Kamoa Holding).

Kamoa-Kakula was deemed to have reached commercial production on July 1, 2021, after achieving a milling rate in excess of 80% of design capacity and recoveries in excess of 70% for a continuous period of seven days. 187,015 tonnes of copper in concentrate was produced during the six months ended June 30, 2024 (June 30, 2023: 197,389).

On March 21, 2014, a financing agreement was entered into between Ivanhoe Mines Energy DRC SARL (a subsidiary of Kamoa Holding) and La Société Nationale d’Électricité SARL (“SNEL”), relating to the first-stage upgrade of two existing hydroelectric power plants in the DRC to feed up to 113 MW into the national power supply grid and for the supply of electricity to the Kamoa-Kakula Project. All six new turbines at the Mwadingusha hydropower plant were synchronized to the national electrical grid in August 2021, with each generating unit producing approximately 13 megawatts (MW) of power, for a combined output of approximately 78 MW. In August 2021, Ivanhoe Mines Energy DRC SARL (“Ivanhoe Mines Energy”) signed an extension of the existing financing agreement with SNEL to upgrade turbine 5 at the Inga II hydropower complex. Turbine 5 is expected to produce 178 MW of renewable hydropower, providing the Kamoa-Kakula Copper Complex and the planned, associated smelter with sustainable electricity for future expansions.

In December 2023, SNEL and Ivanhoe Mines Energy DRC SARL signed an amendment to the existing financing agreement to fund the identified infrastructure upgrades. The original financing agreement consisted of a loan of up to \$250 million to fund the refurbishment of 78 megawatts (MW) of generation capacity at the Mwadingusha dam and 178 MW of generation capacity from Turbine #5 at the Inga II dam. The refurbishment of the Mwadingusha facility was completed in September 2021, and the refurbishment of Turbine #5 at Inga II is on schedule to be completed in the fourth quarter of 2024. The amendment to the financing agreement expands the loan up to a total of \$450 million. Under the agreements, Ivanhoe Mines Energy agreed to provide a loan relating to the power upgrade. The total loan advanced as at June 30, 2024 amounts to \$353.1 million (December 31, 2023: \$306.6 million) comprising of a capital amount of \$293.9 million (December 31, 2023: \$252.5 million) and interest of \$59.2 million (December 31, 2023: \$54.1 million) and is included in the net assets of the joint venture under the heading “Long-term loan receivable”.

The term for repayment of the principal amount, accrued interest and future costs is estimated to be 25 years, beginning after the expiry of a two-year grace period from the signing date of the agreement. The actual repayment period will ultimately depend on the amount actually financed and on the amounts deducted from electricity bills based on a fixed percentage of 40% of the actual bill as per the loan repayment terms. Interest was earned at a rate of 6-month Term SOFR plus 3%. The Kamoa-Kakula Project has a priority electricity right by which SNEL commits to make available as per an agreed power requirements schedule, sufficient energy from its grid to meet the energy needs of the project. The table below summarizes the long-term loan receivable:

- (i) The DRC government holds a direct 20% interest in Kamo-Kakula. A 5%, non-dilutable interest in the project was transferred to the DRC government on September 11, 2012 for no consideration, pursuant to the 2002 DRC mining code. Following the signing of an agreement in November 2016, an additional 15% interest in the project was transferred to the DRC government.

Commitments and contingencies of the joint venture

From time to time, Kamo Holding becomes subject to claims, temporary measures, legal proceedings, financial sanctions or assessments made by tax or other authorities in the ordinary course of its business. Given the complexity and scope of Kamo Holding's business, such claims may involve complex legal, tax or accounting matters. Management assesses Kamo Holding's liabilities and contingencies for all tax years open to claims or assessment based upon the latest information available. Kamo Holding accrues for such claims, or makes provision, in its consolidated financial statements, when a liability resulting from the claim is both probable and the amount can be reasonably estimated. In order to assess such likelihood management reviews claims with the benefit of internal and external legal advice where appropriate.

Kamo Holding is currently subject to several such claims which have been determined by management, with the benefit of legal advice, to be without merit and justification and therefore not probable that a liability would arise therefrom. Such determinations are based on current information and advice, which is subject to change based on changed facts or circumstances. Accordingly, management may re-assess any prior determination regarding the likelihood of a probable liability at any time.

Assets under construction includes development costs capitalized as property, plant and equipment which are costs incurred to obtain access and to provide facilities for extracting, treating, gathering, transporting and storing the minerals. Costs incurred at the Platreef Project are deemed necessary to bring the Project to commercial production and are therefore capitalized. Until December 31, 2019, costs incurred at the Kipushi Project were also deemed necessary to bring the project to commercial production and were therefore capitalized. Between Q1 2020 and Q2 2022, the Kipushi Project was on reduced activities and incurred limited costs of a capital nature. All costs during this period were expensed as "Exploration and project evaluation expenditure" on the consolidated statements of comprehensive income (see Note 6). All costs incurred at the Kipushi Project from July 1, 2022 have been capitalized to property, plant and equipment.

Assets pledged as security

Buildings with a carrying amount of \$8.7 million (December 31, 2023: \$8.8 million) have been pledged to secure borrowings of the Company (see Note 17 (iv)). The buildings have been pledged as security for bank loans under a mortgage. The Company is not allowed to pledge these assets as security for other borrowings or to sell them to another entity.

6. Mineral properties and exploration and project evaluation expenditure

Mineral properties

The following table summarizes the carrying values of the Company's mineral property interests as described below:

	June 30, 2024	December 31, 2023
	\$'000	\$'000
Platreef property, South Africa (a)	6,940	6,940
Kipushi Properties, Democratic Republic of the Congo (b)	252,337	252,337
Exploration properties (c)	29,461	11,341
	288,738	270,618

Costs directly related to the acquisition of mineral properties are capitalized as mineral properties on a property-by-property basis, whereas development costs are capitalized as property, plant and equipment and are costs incurred to obtain access and to provide facilities for extracting, treating, gathering, transporting and storing the minerals. Development costs are capitalized to the extent that they are necessary to bring the property to commercial production.

(a) Platreef property

Construction of the planned Platreef mine is underway on the Company's discovery of palladium, platinum, rhodium, nickel, copper and gold on the Northern Limb of South Africa's Bushveld Igneous Complex approximately 8 km from Mokopane and 280 km northeast of Johannesburg, South Africa.

In November 2014, the mining right for the development and operation of the Platreef mining project was executed. The mining right authorizes the Company to mine and process platinum-group metals, nickel, copper, gold, silver, cobalt, iron, vanadium and chrome. The mining right was issued for an initial period of 30 years and may be renewed for further periods, each of which may not exceed 30 years at a time, in accordance with the terms of section 24 of the Mineral and Petroleum Resources Development Act of South Africa.

In February 2022, the Company announced the positive findings of an independent Platreef 2022 Feasibility Study for the tier one Platreef palladium, platinum, rhodium, nickel, copper and gold project in South Africa. The 2022 Feasibility Study provides the blueprint for the ongoing development of Platreef. Development activities have been ongoing at Platreef with Shaft 1, the initial access to the orebody, now in operation and hoisting development rock from underground. The Company has been focusing on construction activities to bring Phase 1 of Platreef into production.

A Japanese consortium comprising ITOCHU Corporation, Japan Oil, Gas and Metals National Corporation (JOGMEC); and Japan Gas Corporation holds an effective 10% interest in the Platreef Project. The Company transferred an additional 26% of Platreef to a broad-based black economic empowerment (B-BBEE) special purpose vehicle in compliance with South African ownership requirements.

(b) Kipushi properties

The Kipushi Project is a historic, high-grade underground copper-zinc-germanium-silver-lead mine in the Central African Copperbelt, in Haut-Katanga Province, Democratic Republic of the Congo ("DRC"). The Kipushi Project lies adjacent to the town of Kipushi and the border with Zambia, and about 30 km southwest of the provincial capital of Lubumbashi. Ivanhoe Mines and La Générale des Carrières et des Mines SARL ("Gécamines") own 62% and 38% of the Kipushi Project respectively, through their holdings in Kipushi Corporation SA ("Kipushi"), the mining rights holder.

(b) Kipushi properties (continued)

Ivanhoe Mines' interest in Kipushi was acquired in November 2011 and comprises mining rights for zinc, copper and cobalt as well as the underground workings and related infrastructure, inclusive of a series of vertical mine shafts.

On December 15, 2023 the Company signed the new joint venture agreement with its partner Gécamines to restart the ultra-high-grade Kipushi zinc-copper-germanium-silver mine.

(c) Exploration properties

The Company's DRC exploration group is targeting Kamao-Kakula style copper mineralization through a regional drilling program on its 60%-100%-owned Western Foreland exploration licences, located to the north, south and west of the Kamao-Kakula Project, and elsewhere.

During Q4 2022, the Company was granted three new 100%-owned exploration rights on the Northern Limb of the Bushveld Complex in South Africa. These exploration rights cover 80 square kilometres forming a continuous block situated on the southwest border of the existing Platreef Project's mining rights.

During Q4 2023, the Company acquired joint venture licences in the Western Foreland. Under the terms of the joint venture that covers the 247 square kilometres of newly acquired licences, Ivanhoe has an initial interest of 10% with an earn-in right to increase its ownership by funding ongoing exploration activities.

During Q1 2024, the Company increased its interest in Kampemba Corporation, one of the joint venture licence holders, from 10% to 60% due to the exercise of the earn-in right.

Exploration and project evaluation expenditure

Exploration and project evaluation expenditure is expensed in the period incurred, until such time as the Company determines that a property is technically feasible and commercially viable, whereafter costs associated with development are capitalized as property, plant and equipment in the assets under construction category (see Note 5).

Recoverability of assets

The Company has concluded that there is no impairment required to any of its projects. Significant judgments and assumptions are required in making estimates of determining the recoverable amount (the higher of fair value less cost of disposal and value in use). This is particularly so in the assessment of long-life assets. It should be noted that the valuations are subject to variability in key assumptions including, but not limited to, long-term commodity prices, capital expenditures, discount rates, transport costs and the cost of production and operating costs.

In assessing impairment, management have considered various external and internal factors such as but not limited to: (i) market value changes in commodity prices; (ii) any adverse economic or significant changes to the legal environment in which the asset/entity operates (iii) changes in the interest rate environment that might impact the discount rate used in calculating the asset's recoverable amount; (iv) any damage or potential obsolescence, (v) comparison of managements future net cash flows with previous budgets and forecasts and assessing if any significant decline has occurred.

7. Deferred tax

The Company's deferred tax assets and liabilities are as follows:

	June 30, 2024	December 31, 2023
	\$'000	\$'000
<i>Deferred tax asset to be recovered after more than 12 months</i>		
Property, plant and equipment and mining capital expenditure	171,422	166,422
Unrealized foreign exchange losses	49,367	51,064
IFRS 16 leases	2,980	2,970
Tax losses carried forward	2,101	2,458
<i>Deferred tax asset to be recovered within 12 months</i>		
Provisions and prepayments	776	717
	226,646	223,631
<i>Deferred tax liability to be recovered after more than 12 months</i>		
Deferred interest on loans	2,493	2,493
Deferred tax liability	2,493	2,493

Deferred income tax assets are recognized for tax loss carry-forwards to the extent that the realization of the related tax benefit through future taxable profits is probable.

Due to the conclusion of the stream-financing agreements and the announcement of the positive results of the independent 2022 Feasibility Study, the Company considers it highly probable that the Platreef Project will have future taxable profits that will be available against which the deductible temporary differences can be utilized.

Due to the positive findings of the independent 2022 Feasibility Study, the Company considers it probable that the Kipushi Project will have future taxable profits that will be available against which the deductible temporary differences can be utilized.

Loan to Nzuri Exploration Holding Company Pty Ltd (ii)	327	327
Other loans receivable	15	15
	47,222	46,017

- (i) A long-term loan receivable from Gécamines of \$10 million was ceded to the Company on completion of the purchase of Kipushi on November 28, 2011, by the seller. An additional \$20 million was requested and advanced to Gécamines during November 2012.

Repayment will be made by offsetting the loan against future royalties and dividends payable to Gécamines from future profits earned at Kipushi. The fair value of the receivable at acquisition date was estimated by the Company by calculating the present value of the future expected cash flows using an effective interest rate of 9.2%. The carrying value of the long-term loan receivable as at June 30, 2024 is \$46.9 million (December 31, 2023: \$45.7 million). Interest of \$1.2 million was earned during the six months ended June 30, 2024 (June 30, 2023: \$1.3 million) (see Note 26).

The Company has an accumulated expected credit loss allowance of \$0.5 million as at June 30, 2024 (December 31, 2023: \$0.5 million) in accordance with IFRS 9 for the social development loan.

- (ii) In September 2019, the Company, through its wholly-owned subsidiary, Ivanhoe DRC Holding Limited, extended a loan to Nzuri Exploration Holding Company Pty Ltd ("Nzuri"). The loan was advanced to fund exploration activities of a subsidiary of Nzuri in the DRC. The Company has a 10% equity investment in Nzuri (see Note 10).

9. Promissory note receivable

The Company has the following promissory note receivable:

	June 30, 2024	December 31, 2023
	\$'000	\$'000
Promissory note receivable from Crystal River	26,827	26,814
Loss allowance	(14)	(14)
	26,813	26,800

The promissory note receivable with a carrying value of \$26.8 million is a non-interest-bearing, 10-year promissory note, of which \$8.3 million is receivable by the Company as the purchase consideration for selling 1% of its share in Kamoia Holding to Crystal River (see Note 4). The remaining \$18.5 million is receivable for subsequent funding provided to Kamoia Holding on Crystal River's behalf. The promissory note is payable on the earlier of December 8, 2025 or the next business day following the completion of the sale, transfer or disposition of the shares held by Crystal River in Kamoia Holding.

- (i) On June 30, 2023, the Company entered into an exchange agreement with I-Pulse Inc. ("I-Pulse"), wherein the Company replaced the outstanding secured loan balance owed to it by HPX with an equity investment in I-Pulse. Under the agreement, the Company transferred all of its rights, interest and benefits in, to and under the loan facility agreement with HPX to I-Pulse, in exchange for the issuance of shares in I-Pulse to the Company.

The Company's equity investment in I-Pulse comprises approximately 5% of the issued and outstanding share capital of I-Pulse. I-Pulse, the parent company of HPX, is a private American company and is a global leader and developer of pulsed-power technology with its research facilities based in Toulouse, France.

- (ii) On March 11, 2022, the Company made an equity investment in Renergen Ltd. ("Renergen"). Renergen is a public company, incorporated in South Africa and is listed on the Johannesburg Stock Exchange and the Australian Stock Exchange. Renergen is an emerging helium and domestic natural gas producer, which holds the rights to renewable natural gas fields with high helium concentrations, in particular the Virginia Gas Project located in the Free State province of South Africa.

Under the terms of the initial subscription agreement, the Company subscribed for 5,631,787 shares, representing an approximate 4.35% interest in Renergen's issued and outstanding shares. The Company paid a subscription price of R35.63 per share for a total consideration of R200.6 million (approximately \$13.3 million). The subscription price per share was equal to 95% of the volume-weighted average traded price of Renergen's shares on the Johannesburg Stock Exchange measured over the 30 trading days prior to March 11, 2022.

The trading value of the shares as at June 30, 2024 is R42.0 million (\$2.3 million). A loss of \$1.8 million on the fair valuation of the shares was recognized for the six months ended June 30, 2024 (June 30, 2023: loss of \$0.6 million). The movement in the fair value of the shares is shown in the table below:

Balance at the end of the period	26,305	306,561

*Refer to Note 3.

On March 17, 2021 the Company concluded a private placement offering of \$575 million of 2.50% convertible senior notes maturing in 2026. The notes will be convertible at the option of holders, prior to the close of business on the business day immediately preceding October 15, 2025, only under certain circumstances and during certain periods, and thereafter, at any time until the close of business on the second scheduled trading day immediately preceding the maturity date. Upon conversion, the convertible notes may be settled, at the Company's election, in cash, common shares or a combination thereof. Due to this election right and conversion feature, the convertible notes have an embedded derivative liability that is measured at fair value with changes in value being recorded in profit or loss, as well as the host loan that is accounted for at amortized cost. The convertible senior notes are senior unsecured obligations of the Company, which accrue interest payable semi-monthly in arrears at a rate of 2.50% per annum. The notes will mature on April 15, 2026, unless earlier repurchased, redeemed or converted.

On April 30, 2024, the Company announced that it would redeem all of its outstanding convertible senior notes on July 11, 2024 (the "Redemption Date") at a price equal to 100% of the principal amount of the notes redeemed plus accrued and unpaid interest on such notes to, but not including, the Redemption Date. The Company would settle any conversions solely in shares, except that any fractional shares that would otherwise be deliverable will be paid out in cash. In lieu of surrendering their notes for redemption, holders could elect to convert their notes at any time before the close of business on July 10, 2024.

The conversion rate for all conversions of notes was 138.7073 Class A shares of the Company per \$1,000 principal amount of notes. The conversion rate includes an increase of 4.1391 additional shares per \$1,000 principal amount of notes above the conversion rate as the notes are called for redemption (calculated based on a ten-day average closing share price of C\$19.2520, or \$14.0363 at the prevailing exchange rate of C\$1.3717 to \$1.00).

As at June 30, 2024, holders of \$541,588,000 worth of notes elected to redeem their notes, resulting in the issuance of 75,122,187 Class A shares. The remainder of the notes, totaling \$33,412,000, eligible for conversion into 4,634,488 Class A shares, remained outstanding at quarter end.

Prior to the commencement of the conversion period, the Company adjusted the amortized cost of the host liability to reflect actual and revised estimated contractual cash flows using the original effective interest rate in accordance with the requirements of IFRS 9. The adjustment resulted in finance costs of \$71 million being recorded by the Company due to the early redemption of the notes, of which \$43 million was capitalized as borrowing costs to property, plant and equipment.

15. Convertible notes (continued)

Each conversion request was treated separately. The number of shares required to be issued on receipt of a conversion request was calculated with reference to the conversion rate of 138.7073 Class A shares per \$1,000 principal amount of notes and rounded down to the nearest whole number. Any fractional shares that would otherwise be deliverable was paid out in cash. The total cash paid during the period was inconsequential. The fair value of the notes underlying a conversion request was determined with reference to the closing price of the Company's shares on the Toronto Stock Exchange on the date of delivery of the shares and the prevailing exchange rates. The date of delivery of the shares was 2 business days after the receipt of the conversion request. It is at this delivery date, that the convertible notes are extinguished.

The host liability and embedded derivative liability components of the convertible notes were settled at each delivery date in proportion to the number of notes converted as a percentage of the total number of notes issued. The result of this is that the balance of the host liability and embedded derivative liability as at June 30, 2024, represented the liability of the Company for the notes not yet converted by holders.

The carrying value of the host liability was \$33.4 million as at June 30, 2024 (December 31, 2023: \$496.0 million). The fair value of the embedded derivative liability on June 30, 2024 was \$26.3 million (December 31, 2023: \$306.6 million).

A fair value loss of \$160 million (June 30, 2023: loss of \$57.5 million) was recognized in the condensed consolidated interim statements of comprehensive income, mainly due to an increase in the closing price of the Company's shares as reported on the Toronto Stock Exchange from the beginning of the year to June 30, 2024.

The following key inputs and assumptions were used when determining the fair value of the embedded derivative liability:

	March 17, 2021	June 30, 2023	December 31, 2023	June 30, 2024
Share price	C\$7.00	C\$12.10	C\$12.85	C\$17.65
Credit spread (basis points)	630	263	400	N/A
Volatility	42%	36%	43%	N/A
Borrowing cost (basis points)	50	25	25	N/A
Fair value of derivative liability (\$' million)	\$150.5	\$278.8	\$306.6	\$26.3

16. Deferred revenue

	June 30, 2024	December 31, 2023
	\$'000	\$'000
Balance at the beginning of the year	328,096	310,725

Balance at the end of the period	349,835	328,096

On December 8, 2021, the Company announced that Ivanplats (Pty) Ltd., its South African subsidiary and owner of the Platreef Project, had concluded stream-financing agreements with Orion Mine Finance ("Orion") and Nomad Royalty Company ("Nomad"), together the "Stream Purchasers", for a \$200 million gold-streaming facility and a \$100 million palladium and platinum-streaming facility.

16. Deferred revenue (continued)

Under the stream agreements, Orion provided a total of \$225 million in funding, and Nomad provided \$75 million in funding. The stream facilities are a prepaid forward sale of refined metals, with prepayments totalling \$300 million, available in two tranches. The first prepayment of \$75 million was received by the Company in December 2021, following the closing of the transaction. The remaining \$225 million was received in September 2022, after successfully fulfilling the conditions precedent.

Under the terms of the \$200 million gold stream agreement, the Stream Purchasers will receive an aggregate total of 80% of contained gold in concentrate until 350,000 ounces have been delivered, after which the stream will be reduced to 64% of contained gold in concentrate for the remaining life of the facility. The expected life of this facility will extend from the effective date of the stream agreement until the date when 685,280 ounces of gold have been delivered to the Stream Purchasers. The Stream Purchasers will purchase each ounce of gold at a price equal to the lower of the market price of gold or US\$100 per ounce.

Delivery of the gold under the stream agreement will be made by delivering gold credits to the Stream Purchasers' metal accounts.

Under the terms of the US\$100 million palladium and platinum stream agreement, Orion will receive an aggregate total of 4.2% of contained palladium and platinum in concentrate until 350,000 ounces have been delivered, after which the stream will be reduced to 2.4% for the remaining life of the facility. The expected life of this facility will extend from the effective date of the stream agreement until the date when 485,115 ounces of palladium and platinum have been delivered to the purchaser, which will pay for each ounce at a price equal to 30% of the market price of palladium and platinum.

Delivery of the palladium and platinum under the stream agreement will be made by delivering palladium and platinum credits to the Stream Purchasers' metal accounts. The advance payment of \$300 million, net of transaction costs of \$6.5 million, is recognized as a contract liability (deferred revenue) under IFRS 15.

The stream-financing agreements are accounted for as deferred revenue as the Company has applied judgment in concluding that the contracts fall within the "own-use" exemption in IFRS 9. Therefore, the contracts are not accounted for under the requirements of IFRS 9, but were deemed to fall within the scope of IFRS 15 as the Company intends to settle the obligations through delivery of its own production from the Platreef mine once commissioned.

In accordance with IFRS 15, the Company has recognized a notional financing charge of \$19.4 million for the six months ended June 30, 2024 (June 30, 2023: \$19.9 million) due to the time between receiving the upfront streaming payments and the date that the related performance obligations will be satisfied. The Company has estimated that the ZAR-based nominal pre-tax rate is 15.37% under the gold stream agreement, and 14.81% under the palladium and platinum stream agreement.

Settlements on the stream-financing arrangements will start once the commissioning of the Platreef Project has been completed.

- (i) On May 28, 2024, Kipushi Corporation SA (Kipushi), a subsidiary of the Company and the operator of the Kipushi Project, entered into a \$50 million facility agreement with FirstBank DRC SA (FirstBank). Under the terms of the agreement, FirstBank provided a \$50 million facility to Kipushi to finance costs related to the development of the project. Kipushi drew down on the full facility on the date of the agreement. The facility incurs interest at 3-month Term SOFR plus a margin of 4.5% per annum. Interest is repayable every three months, with the facility repayable in full in May 2025. Repayment may automatically be extended by a further consecutive 12 months unless either party to the agreement gives written confirmation that there shall be no such automatic extension of the date. Ivanhoe Mines Ltd. has provided a corporate guarantee under this loan agreement.
- (ii) On May 22, 2023, Kipushi entered in a loan agreement with Rawbank SA (Rawbank), a financial institution in the Democratic Republic of the Congo.

Under the terms of the loan agreement, Rawbank provided an \$80 million loan, to be drawn down in two tranches of \$40 million each, to Kipushi to fund its working capital requirements. Both tranches were drawn down in 2023.

The loan incurs interest at 8% per year plus commission of 0.5% per quarter. Interest on the loan is repayable monthly in arrears. During the quarter, a capital repayment of \$40 million was made. Current market rates on similar facilities with Rawbank offer the same interest rates available to the Company as the existing loan. Ivanhoe Mines Ltd. has provided a corporate guarantee under this loan agreement.

17. Borrowings (continued)

- (iii) On August 4, 2023, the Company entered into an \$18.2 million loan agreement with Investec Bank Limited, a South African financial institution, in respect of its acquisition of an aircraft. Interest on the loan is incurred at Overnight SOFR plus a margin of 3.65% per annum and is payable monthly in arrears. The principal amount is repayable monthly in sixty equal instalments. The Company repaid \$1.5 million of the principal amount and \$0.8 million in interest during the six months ended June 30, 2024. The loan is secured by the aircraft.
- (iv) The Citibank loan of \$4.1 million (£3.2 million) is secured by the Rhenfield property (see Note 30). The loan is an interest-only term loan repayable on August 28, 2025, and incurs interest at a rate of 1-month Sterling Overnight Index Average (SONIA) plus 1.90% payable monthly in arrears. Interest of \$0.1 million was incurred for the six months ended June 30, 2024 (June 30, 2023: \$0.1 million).
- (v) On June 6, 2013, the Company, through its subsidiary Ivanplats (Pty) Ltd, ("Ivanplats") the owner of the Platreef Project, became party to a \$28.0 million loan payable to ITC Platinum Development Limited. The loan is repayable only once Ivanplats has residual cashflow, which is defined in the loan agreement as gross revenue generated by Ivanplats, less all operating costs attributable thereto, including all mining development and operating costs. The loan incurs interest of 3-month Term SOFR plus 2.26% calculated monthly in arrears. Interest is not compounded. Interest of \$1.7 million (June 30, 2023: \$0.4 million) was recognized during the six months ended June 30, 2024 and was capitalized as borrowing costs. The carrying value of the loan as at June 30, 2024 is equal to the contractual amount due.

The Company makes provision for the future cost of rehabilitating mine sites and related production facilities on a discounted basis at the time of developing its mines and installing and using those facilities. The rehabilitation provision represents the present value of rehabilitation costs relating to mine sites, which are expected to be incurred up to 2054 for Platreef and 2038 for Kipushi, which is when the producing mine properties are expected to cease operations. The provision has been calculated based on an independent assessment. Assumptions based on the current economic and regulatory environment have been made, which management believes are a reasonable basis upon which to estimate the future liability. These estimates are reviewed regularly to take into account any material changes to the assumptions. However, actual rehabilitation costs will ultimately depend upon future market prices for the necessary rehabilitation works required that will reflect market conditions at the relevant time. Furthermore, the timing of rehabilitation is likely to depend on when the mine ceases to produce at economically viable rates. This will depend upon several factors which are inherently uncertain.

The undiscounted closure cost liability estimate balance as at June 30, 2024 was \$20.0 million for Platreef (December 31, 2023: \$17.3 million), and \$26.0 million for Kipushi (December 31, 2023: \$15.6 million). The real discount rate used in the calculation of the provision as at June 30, 2024 equalled 6.86% (December 31, 2023: 7.16%) for Platreef, and 2.08% (December 31, 2023: 0.74%) for Kipushi.

21. Share capital

- (a) Shares issued

The Company is authorized to issue an unlimited number of Class A Shares.

As at June 30, 2024, 1,344,971,901 (December 31, 2023: 1,268,762,524) Class A Shares were issued and outstanding. All shares in issue have been fully paid.

On April 30, 2024, the Company announced that it would redeem all of its outstanding convertible senior notes (See Note 15). In lieu of surrendering their notes for redemption, holders may elect to convert their notes at any time before the close of business on July 10, 2024. As at June 30, 2024, holders of \$541,588,000 worth of notes elected to convert their notes, resulting in the issuance of 75,122,187 Class A shares.

- (b) Options

The Company issues share options as a security-based compensation arrangement. Share options are granted at an exercise price equal to the volume weighted average price of the shares on the TSX for the five days immediately preceding the date of the grant. As at June 30, 2024, 83,693,072 share options have been granted and exercised, and 13,823,794 have been granted and are outstanding.

(b) Options (continued)

All outstanding share options granted before December 2019 vest in four equal parts, commencing on the one year anniversary of the date of grant and on each of the three anniversaries thereafter. All share options granted during and after December 2019 vest in three equal parts, commencing on the one year anniversary of the date of grant and on each of the two anniversaries thereafter. The maximum term of options awarded is seven years.

A summary of changes in the Company's outstanding share options is presented below. The changes for 2024 represent the period January 1, 2024 to June 30, 2024, while the changes for 2023 represent the period January 1, 2023 to December 31, 2023.

21. Share capital (continued)

(b) Options (continued)

As at December 31, 2023, the Company had 13,078,667 share options outstanding at a weighted average exercise price of \$4.30. Of this amount, 10,323,368 share options were exercisable at a weighted average exercise price of \$3.27.

(c) Share unit awards

The Company issues restricted share units ("RSUs") and performance share units ("PSUs"), together known as share unit awards, as a security-based compensation arrangement. Each RSU and PSU represents the right of an eligible participant to receive one Class A Share.

RSUs and PSUs vest in three equal parts, commencing on the initial vesting date established at grant and on each of the two anniversaries thereafter, subject to the satisfaction of any performance conditions.

A summary of changes in the Company's RSUs and PSUs is presented below. The changes for 2024 represent the period January 1, 2024 to June 30, 2024, while the changes for 2023 represent the period January 1, 2023 to December 31, 2023.

PSUs cancelled	(12,961)	(6,442)
Balance at the end of the period	4,406,919	3,811,889

An expense of \$12.5 million will be amortized over the vesting period for the share unit awards granted during the six months ended June 30, 2024 (June 30, 2023: \$8.7 million), using the fair value of a common share at time of grant. The weighted average fair value of a common share at the time that the share unit awards were granted in 2024 was \$9.99 (December 31, 2023: \$8.87). An expense of \$11.9 million (June 30, 2023: \$10.3 million) was recognized for the six months ended June 30, 2024 relating to share unit awards granted, of which \$1.9 million related to those granted in 2024 (see Note 24).

(d) Deferred share units

The Company issues deferred share units ("DSUs") as a security-based compensation arrangement to non-executive directors of the Company. Each DSU represents the right of an eligible participant to receive one Class A Share or the cash equivalent thereof. The debt component of the instrument represents the entire fair value of the award and is disclosed below.

A summary of changes in the Company's DSUs is presented below. The changes for 2024 represent the period January 1, 2024 to June 30, 2024, while the changes for 2023 represent the period January 1, 2023 to December 31, 2023.

(d) Deferred share units (continued)

An expense of \$0.9 million (June 30, 2023: \$0.8 million) was recognized for the DSUs granted during the six months ended June 30, 2024. A loss of \$1.8 million (June 30, 2023: loss of \$0.9 million) was recognized for DSUs granted during prior years due to the increase in the Company's share price which resulted in a increase in the deferred share unit liability. In accordance with the DSU plan, directors may elect to receive settlement of their DSUs in cash or shares.

DSUs vest over the calendar year in which they are granted and are settled on December 31st of the calendar year that is three years following the award date of each respective DSU.

22. Foreign currency translation reserve

28. Profit per share

The basic profit per share is computed by dividing the profit attributable to the owners of the Company by the weighted average number of common shares outstanding during the period. The diluted profit per share reflects the potential dilution of common share equivalents, such as outstanding stock options, share unit awards, deferred share units and the convertible notes in the weighted average number of common shares outstanding during the period, if dilutive. The convertible notes were anti-dilutive for the three and six months ended June 30, 2024 and 2023.

	Three months ended June 30,		Six months ended June 30,	
	2024	2023	2024	2023

32. Financial instruments (continued)

(a) Fair value of financial instruments (continued)

IFRS 13 - Fair value measurement, requires an explanation about how fair value is determined for assets and liabilities measured in the financial statements at fair value and establishes a hierarchy into which these assets and liabilities must be grouped based on whether inputs to those valuation techniques are observable or unobservable. Observable inputs reflect market data obtained from independent sources, while unobservable inputs reflect the Company's assumptions. The two types of inputs create the following fair value hierarchy:

- Level 1: observable inputs such as quoted prices in active markets;
- Level 2: inputs, other than the quoted market prices in active markets, which are observable, either directly and/or indirectly; and
- Level 3: unobservable inputs for the asset or liability in which little or no market data exists and therefore require an entity to develop its own assumptions.

Investment in listed entities

The fair value is the market value of the listed shares at the end of the period.

Investment in unlisted entity

The Company acquired these shares on September 12, 2019. No significant changes occurred between acquisition date and June 30, 2024 and the Company has therefore determined that the purchase price approximates the fair value.

Investment in I-Pulse Inc.

The Company acquired these shares on June 30, 2023. The purchase price approximates the fair value. Prior to the acquisition of the investment, a sum of the parts valuation of I-Pulse was performed, driven by the revenue generating business units of I-Pulse and underlying investments thereof. Additionally, historic equity financing of I-Pulse was considered in determining comparable valuations. This indicated that the purchase price of the investment approximated its fair value.

Loan advanced to the joint venture

Carrying amount is a reasonable approximation of fair value. The Company earned interest on the loan at USD 12-month LIBOR +7% until June 30, 2023. Following the cessation of publication of LIBOR rates, interest was calculated at a rate of 12-month Term SOFR plus 7.71% from July 1, 2023.

Long-term loans receivable (Social development loan)

Carrying amount is a reasonable approximation of fair value. The fair value of the receivable at acquisition date was estimated by the Company by calculating the present value of the future expected cash flows using an effective interest rate of 9.2%.

Promissory note receivable

Carrying amount is a reasonable approximation of fair value. The creditworthiness of the promissory note holder is considered to be high (see Note 32(b)(ii)). The promissory note is payable on the earlier of December 8, 2025 or the next business day following the completion of the sale, transfer or disposition of the shares held by Crystal River in Kamo Holding.

Other receivables

Carrying amount is a reasonable approximation of fair value due to the short-term nature of the receivable (less than 1 month).

Convertible notes (host liability)

The fair value of the liability on initial recognition was estimated by the Company by calculating the present value of the future expected cash flows using an effective interest rate of 9.39%. The fair value of the liability at period-end was estimated by the Company by calculating the present value of the contractual cash flows using a market related interest rate.

(a) Fair value of financial instruments (continued)

Convertible notes (embedded derivative liability)

The fair value of the liability is determined at the end of each reporting period and the fair value gain or loss is recognized in the condensed consolidated interim statements of comprehensive income.

Borrowings (FirstBank facility)

Carrying amount is a reasonable approximation of fair value. The loan incurs interest at 3-month Term SOFR plus a margin of 4.5% per annum (see Note 17(i)).

Borrowings (Rawbank loan facility)

Carrying amount is a reasonable approximation of fair value. The loan incurs interest at 8% per year plus commission of 0.5% per quarter (see Note 17(ii)).

Borrowings (Aircraft loan)

Carrying amount is a reasonable approximation of fair value. The loan incurs interest at SOFR plus a margin of 3.65% per annum (see Note 17(iii)).

Borrowings (Loan from Citibank)

Carrying amount is a reasonable approximation of fair value. The loan is an interest-only term loan repayable on August 28, 2025, and incurs interest at a rate of 1-month Sterling Overnight Index Average (SONIA) plus 1.90% payable monthly in arrears, which approximates the current market interest rate (see Note 17(iv)).

Borrowings (Loan from ITC Platinum Development Limited)

Carrying amount is a reasonable approximation of fair value. The fair value of the loan is determined using a discounted future cashflow analysis (see Note 17(v)).

Trade and other payables

Carrying amount is a reasonable approximation of fair value due to the short-term nature of the payable (less than 1 month).

(b) Financial risk management objectives and policies

The risks associated with the Company's financial instruments and the policies to mitigate these risks are set out below. Management manages and monitors these exposures to ensure appropriate measures are implemented in a timely and effective manner.

(i) Foreign exchange risk

The Company incurs certain of its expenses in currencies other than the U.S. dollar. The Company also has foreign currency denominated monetary assets and liabilities. The Company's key exposure to foreign exchange risk arises from the convertible notes, which is impacted by the Canadian Dollar when the prevailing share price is converted into Dollars. As such, the Company is subject to foreign exchange risk as a result of fluctuations in exchange rates. The Company has a policy to enter into derivative instruments to manage foreign exchange exposure as deemed appropriate. The carrying amount of the Company's foreign currency denominated monetary assets and liabilities at the respective statement of financial position dates are as follows:

Foreign currency sensitivity analysis

The following table details the Company's sensitivity to a 5% increase or decrease in the U.S. dollar against the foreign currencies presented. The sensitivity analysis includes only outstanding foreign currency denominated monetary items not denominated in the functional currency of the Company or the relevant subsidiary, and adjusts their translation at the end of the period for a 5% change in foreign currency rates. A positive number indicates a decrease in loss for the period where the foreign currencies strengthen against the U.S. dollar. The opposite number will result if the foreign currencies depreciate against the U.S. dollar.

(ii) Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations. Credit risk for the Company is primarily associated with the loan to the joint venture, promissory note receivable, long-term loans receivable, other receivables and cash and cash equivalents.

The Company reviews the recoverable amount of its financial assets at each statement of financial position date to ensure that adequate provision is made for expected credit losses on a timely basis. Current and future estimated macroeconomic factors, as well as relevant interest rates are considered as inputs into the provision calculation.

32. Financial instruments (continued)

(b) Financial risk management objectives and policies (continued)

(ii) Credit risk (continued)

The Company classifies its financial assets at amortized cost in categories that reflect their credit risk as follows:

- Performing financial assets – Financial assets with a low risk of counterparty default. A 12-month expected credit losses are calculated for these financial assets.
- Underperforming financial assets – Financial assets with a significant increase in credit risk. Lifetime expected credit losses are calculated for these financial assets.
- Non-performing financial assets – Financial assets that are in default. Lifetime expected credit losses are calculated for these financial assets.
- Written off financial assets – Financial assets where the principal and/or interest will not be recovered, based on observable data. These financial assets are written off through profit or loss to the extent of the expected credit loss.

All of the Company's financial assets are deemed to be performing financial assets based on the above categorization. As such the general approach was applied to calculate the 12-month expected credit losses. There were no movements between the categorization during the current and comparative reporting periods as there has not been an increase in credit risk associated with these financial assets.

A significant increase in credit risk would include:

- Existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant change in the borrower's ability to meet its debt obligations.
- An actual or expected significant change in the operating results of the borrower.
- Significant increases in credit risk on other financial instruments of the same borrower.
- An actual or expected significant adverse change in the regulatory, economic, or technological environment of the borrower that results in a significant change in the borrower's ability to meet its debt obligations.
- Significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements, which are expected to reduce the borrower's economic incentive to make scheduled contractual payments or to otherwise have an effect on the probability of a default occurring.

None of the Company's financial assets are deemed to be in default, which is defined as the structural failure of a counterparty to perform under an agreement with the Company.

For all financial assets measured at amortized cost, the Company calculates the expected credit loss based on contractual payment terms of the asset. The exposure to credit risk is influenced by the individual characteristics and the long and short term nature of the counterparty.

The Company assesses whether an impairment is required on loan receivables. A range of cash flow scenarios are considered, taking into account forward-looking information which may impact recoverability of loan receivables.

The loan advanced to the joint venture will be repaid as and when there is residual cash flow in Kamo Holding. The expected credit loss is considered not material to the Company.

The promissory note receivable will be repaid using proceeds from the sale of Crystal River's 1% stake in Kamo Holding. The expected credit loss is considered not material to the Company (see Note 9).

32. Financial instruments (continued)

(b) Financial risk management objectives and policies (continued)

(ii) Credit risk (continued)

Repayment of the long-term loan receivable from Gécamines will be made by offsetting the loan against future royalties and dividends payable to Gécamines which arise from future profits to be earned at Kipushi. The Company recorded an expected credit loss allowance of \$0.5 million as at June 30, 2024 in accordance with IFRS 9 (December 31, 2023 \$0.5 million) (see Note 8 (i)).

The credit risk on cash and cash equivalents is limited because the cash and cash equivalents are composed of deposits with major banks who have investment-grade credit ratings assigned by international credit ratings agencies and have low risk of default. Credit risk is managed through the application of funding approvals, liquidity analysis and monitoring procedures. The Company's treasury function provides credit risk management for the group-wide exposure in respect of a diversified banking portfolio. These are evaluated regularly for financial robustness especially within the context of the current global economic environment as well as the jurisdictions within which the Company operates. The majority of the Group's cash balance is held in Canadian and South African bank accounts. The Company continues to monitor its credit risk and assess expected credit losses. The identified impairment loss in 2024 is considered not material to the Company.

(iii) Liquidity risk

In the management of liquidity risk of the Company, the Company maintains a balance between continuity of funding and the flexibility through the use of borrowings. Management closely monitors the liquidity position and expects to have adequate sources of funding to finance the Company's projects and operations, including the commitments as disclosed in Note 34.

The following table details the Company's expected remaining contractual maturities for its financial liabilities. The table is based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Company can be required to satisfy the liabilities.

	Less than 1 year	1 to 3 years	3 to 5 years	More than 5 years	Total un- discounted cash flows

(b) *Financial risk management objectives and policies (continued)*

(iii) Liquidity risk (continued)

(a) Trade payables in the above table excludes payroll tax, other statutory liabilities, other payables and indirect taxes payable.

33. Capital risk management

The Company includes as capital its common shares and share option reserve. The Company's objectives are to safeguard its ability to continue as a going concern in order to pursue the development of its mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue new debt and acquire or dispose of assets to satisfy cash requirements. In order to facilitate the management of its capital requirements, the Company prepares annual expenditure budgets that are updated as necessary depending on various factors, including capital deployment, results from the exploration and development of its properties and general industry conditions. The annual and updated budgets are approved by the Board of Directors.

In order to maximize ongoing development efforts, the Company does not pay dividends. The Company's investment policy is to invest its cash in highly liquid, short-term, interest-bearing investments, selected with regard to the expected timing of expenditures from operations.

As the Company has a number of development projects, it is largely equity funded.

34. Commitments and contingencies

From time to time, the Company becomes subject to claims, temporary measures, legal proceedings, financial sanctions or assessments made by tax or other authorities in the ordinary course of its business. Such claims may be made against the Company, or its subsidiaries and affiliates, or its joint ventures. Given the complexity, scope and multi-jurisdictional nature of the Company's business, such claims may arise in several jurisdictions and may involve complex legal, tax or accounting matters. Management assesses the Company's liabilities and contingencies for all tax years open to claims or assessment based upon the latest information available. The Company accrues for such claims, or makes a provision, in its financial statements, when a liability resulting from the claim is both probable and the amount can be reasonably estimated. In order to assess such likelihood management reviews claims with the benefit of internal and external legal advice where appropriate.

Some jurisdictions in which the Company operates have legislation empowering authorities to impose restrictions on the operation of the Company's bank accounts in those jurisdictions, or that have a similar effect, notably due to banks' practices, when receiving such instructions from authorities, pending the payment and/or resolution of such alleged claims, investigations, penalties, financial sanctions or assessments. These restrictions or instructions from authorities having a similar effect may be used routinely in such circumstances.

The Company is currently subject to several such claims which have been determined by management, with the benefit of legal advice, to be without merit and justification and therefore not probable that a liability would arise therefrom. Such determinations are based on current information and advice, which is subject to change based on changed facts or circumstances. Accordingly, management may re-assess any prior determination regarding the likelihood of a probable liability at any time.

35. Segmented information

At June 30, 2024, the Company has four reportable segments, being the Platreef property, Kamoia Holding joint venture, Kipushi properties and the Company's treasury offices.

An operating segment is defined as a component of the Company:

- that engages in business activities from which it may earn revenues and incur expenses;
- whose operating results are reviewed regularly by the entity's chief operating decision maker; and
- for which discrete financial information is available.

For these four reportable segments, the Company receives discrete financial information that is used by the chief operating decision maker to make decisions about resources to be allocated to the segment and to assess its performance. The reportable segments are principally engaged in the development of mineral properties in South Africa (see Note 6); exploration and development of mineral properties through a joint venture in the DRC (see Note 4) and the upgrading of mining infrastructure and refurbishment of a mine in the DRC, respectively (see Note 6).

The following is an analysis of the non-current assets by geographical area and reconciled to the Company's financial statements:

36. Approval of the financial statements

The condensed consolidated interim financial statements of Ivanhoe Mines Ltd., for the three and six months ended June 30, 2024, were approved and authorized for issue by the Board of Directors on July 30, 2024.

37. Events after the reporting period

Subsequent to quarter end, all but \$1.2 million worth of convertible notes were converted resulting in the issuance of 4,467,346 Class A shares. \$1.2 million worth of notes remained outstanding by the redemption date of July 11, 2024, resulting in the Company redeeming these notes in cash.

During the quarter, Ivanhoe Marketing (Pty) Ltd., a subsidiary of the Company, entered into off-take agreements with CITIC Metal and Trafigura for the sale of Kipushi concentrate. In addition to the off-take agreements, Kipushi entered into loan facility agreements totalling \$120 million with CITIC Metal and Trafigura (\$60 million each) aligned to the term of the off-take agreements. The facilities incur interest at SOFR plus 6% and were fully drawn during July 2024.

In July 2024, Kipushi settled the remaining capital and accumulated interest outstanding on the Rawbank loan facility.
